### **DETAILED ACTION**

This is a reply to the Applicant's amendment submitted on 11/18/2004. According to this amendment, claims 1, 11, 13, 14, 20 and 21 are cancelled; and thus, claims 2-10, 12, and 15-19 are currently presented in the instant application.

#### ***Allowable Subject Matter***

1. Claims 2-10, 12, and 15-19 are allowed.

#### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:

The closest prior art fails to disclose or fairly suggest:

- a) A semiconductor device including an integrated circuit buffer for receiving a clock input signal and generating a plurality of output signals that are copies of the clock input signal delayed or advanced in time relative to the clock input signal, as called for in claims 2 and 17;
- b) A semiconductor device including a plurality of internal capacitors which are used in conjunction with an external resistor to provide a timing reference, each capacitor having a first capacitor end that is electrically connected to a current source and a second capacitor end that is electrically connected to ground or a voltage reference, as called for in claim 5; and
- c) A method of adjusting the timing of an output signal including a step of generating output signals from a buffer that are copies of a clock input signal delayed or advanced in time relative to the clock input signal, as called for in claim 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
